Diesel Service Log Template

A print-and-file service log with hour-based intervals — the engine's history follows the vessel, not the last owner's memory.

Print one per season, or keep the record digital in your vessel's logbook. Attach or link photos of the old parts — an impeller photo proves the work and speeds up every future quote.

Service Intervals Reference

- ☐ Every run: visual check, alarms, bilge
- ☐ Every 50 hrs: engine bay inspection; impeller check if running shallow or silty water
- ☐ Every 100 hrs: engine oil and filter; fuel filters; belt condition
- ☐ Every 250 hrs: coolant; impeller; transmission fluid; mount inspection
- ☐ Annually: full service; anodes; haul-out checks per the Slipway Protocol

Service Log

Date	Hours	Work Done	Parts	Next Due

Diesel Service Log Template (continued)

Service Log (continued)

Date	Hours	Work Done	Parts	Next Due

Record date, hours, work done, parts and next-due hours every time. A complete log is the single document a surveyor, broker and buyer all ask to see.
